

# ALGA-LIFE

Extract of algae.

## GUARANTEED ANALYSIS

Extract of algae : 15%  
Mannitol: 0,75%

Alginic acid: 2,4%  
Potassium Oxide (K<sub>2</sub>O): 2,4%

## GENERAL FEATURES

**ALGA-LIFE** is a biostimulant that contains **Ascophyllum nodosum (an alga), nitrogen, potassium and molybdenum**. These algae have a high content in cytokinins, auxines and gibberelins and they are treated to preserve all their nutritive features, which are easily absorbed by the plant. In addition, these algae activate the vegetative growth and increase the fruit's quality, production and homogeneity. At the same time, **ALGA-LIFE** is very effective in the moments of top vegetative activity, such as transplanting, sprouting, flowering, setting and fruit fattening. It is an excellent soil conditioner and organic source of macro and microelements.

## DOSE AND INSTRUCTIONS FOR USE

**Foliar application:** dilute with 200-300 cc/hl of water and spray the aerial parts of the plant.  
**Fertigation: Grapevines and vegetables:** 24 L/ha spread in 2-3 applications. **Olive-tree, citrus and fruit-tree in general:** 48 L/ha spread in 3-4 applications. It can be used in both, flood and drip irrigation.

## APPLICATION SEASON

**Olive trees:** apply at the beginning of the bud formation and blooming.  
**Horticultural products:** spray a week before transplanting and, then, apply two or more treatments every 20-30 days.  
**Citrus and fruit trees in general:** first treatment when the petals fall down and two more every 20-30 days.  
**Potatoes, melons, watermelons and strawberries:** first treatment must be carried out when the plant reaches 15cm and two more every 20-30 days.  
**Forage:** treating it when the first leaves appear and apply every 20-30 days.
