

# ANTIESPUMANTE LIFE - 75

**Defoamer for aqueous systems.**

## GUARANTEED RICHNESS

Polydimethylsiloxane: 32%.

### GENERAL FEATURES

**ANTIESPUMANTE LIFE – 75** is an adjuvant that prevents the foam formation in aqueous systems. It is a fluid emulsion that can be dispersed in water. Due to its small dosage and its nature, it is compatible with most foam generators.

Manufactured by:

**AGROQUIMICOS Y NUTRIENTES, S.L.**

### RECOMMENDATIONS FOR USE

#### Dose

The dose is from 2,5 to 5 ml for every 1.000 liters of dissolution.

Its continued use in the same tank allows the reduction of the dose.

#### Instructions for use

Add the indicated dose after adding the product that generates foam and shake well the mixture.

#### Presentación

Bottles of 250 ml. with dosing valve.
