

ANTIESPUMANTE LIFE-75

Defoamer for aqueous systems.

GUARANTEED ANALYSIS

Polydimethylsiloxane: 32

GENERAL FEATURES

ANTIESPUMANTE LIFE - 75 is an adjuvant that prevents the foam formation in aqueous systems. It is a fluid emulsion that can be dispersed in water. Due to its small dosage and its nature, it is compatible with most foam generators.

DOSE AND INSTRUCTIONS FOR USE

Add from 2,5 to 5 ml for every 1.000 liters of dissolution after adding the product that generates foam and shake well the mixture. Its continued use in the same tank allows the reduction of the dose.
