

BAIL FOSFORO

Complex liquid NPK fertilizer with microelements and chelates for foliar application.

GUARANTEED RICHNESS

Total nitrogen (N): 5% = **6% w/v**

Phosphoric anhydride (P_2O_5) soluble in water: 20% = **25% w/v**

Potassium oxide (K_2O) soluble in water: 4% = **5% w/v**

Molybdenum (Mo) soluble in water: 0,001 %

Boron (B) soluble in water: 0,01 %

Chelated copper (Cu): 0,05%

Chelated manganese (Mn): 0,05 %

Chelated zinc (Zn): 0,05 %

GENERAL FEATURES

BAIL FOSFORO is a liquid foliar fertilizer that contains important quantities of **phosphorus** enhanced with chelated microelements. When applied during blooming, **BAIL FOSFORO** favors the set, avoids the fall of small fruits and increases the yield of the crops.

The lack of diffusivity of phosphate fertilizers in the soil can be an inconvenience for the plant's growth. However, **BAIL FOSFORO** is slightly soluble, which makes possible for it to be used via foliar application for a quick absorption.

Manufactured by:

AGROQUIMICOS Y NUTRIENTES, S.L.

RECOMMENDATIONS FOR USE

Dose

For horticultural plants, such as olive-trees, vineyards, citrus fruits and fruit trees in general, please dilute in 300-600 cc/hl of water.

Instructions for use

BAIL FOSFORO is diluted in 300-600 cc/hl of water and sprayed over the parts of the plants above the ground.

Application season

For citrus trees, fruit trees in general, olive-trees, grapevines and horticultural plants its application is recommended during the bud formation, the blooming and when the fruits are setting.

Presentation

Bottles of 1 liter and drums of 5 and 20 liters.
