

FERROLIFE-42

Chelates

ECO-NUT

Corrector chelate of ferric chlorosis.

GUARANTEED ANALYSIS

Iron (Fe) soluble in water: 6%

Chelating Agent: EDDHA

Chelated Iron (Fe) in ortho-ortho EDDHA form: 4,2%

GENERAL FEATURES

FERROLIFE-42 is Iron chelated by EDDHA in soluble microgranules form. This product corrects Iron deficiencies rapidly and effectively via fertigation.

Iron salts form chelates with **EDDHA**. Such chelates are more stable when the soil's carbonates and pH are high. Because of its solubility, **FERROLIFE-42** is strongly recommended for its use in irrigation water and drip-irrigation.

DOSE AND INSTRUCTIONS FOR USE

FERROLIFE-42 can be applied in irrigation water, following the traditional methods of chelates application. **Citrus and fruit-trees: nurseries** 0,5-3 gr/foot; plants **recently planted** 3-15gr/foot; **first production year** 5.30 gr/foot; **medium-sized trees** 25-60 gr/foot; **large-sized trees** 50-100 gr/foot; **vegetables, flowers and ornamental** 1-6 gr/foot; **grapevines** 5-15 gr/foot. The dose should be spread through 3 to 4 applications.

APPLICATION SEASON

Trees-crops: at the beginning of vegetation, after winter dormancy.

Vegetables, flowers and ornamentals: throughout the vegetative cycle, when iron deficiencies are noticed.
