

COBRE-LIFE

Liquid deficiency corrector containing complexed Copper for foliar application.

GUARANTEED RICHNESS

Copper (Cu) soluble in water: 5% = 6% m/v

Complexed Copper (Cu): 4% = 4,8% m/v

Complexing Agent: LIGNOSULFONIC ACID

GENERAL FEATURES

COBRE-LIFE is a liquid corrector of Copper deficiencies, which has been complexed by lignosulfonic acid. Also, **COBRE-LIFE** prevents effectively the attack of fungi and bacteria.

COBRE-LIFE corrects copper deficiencies quickly and effectively, requiring lower doses than inorganic products. Also, it can be used via foliar application and fertigation.

COBRE-LIFE is certified for ecologic agriculture.

Manufactured by:

AGROQUIMICOS Y NUTRIENTES, S.L.

RECOMMENDATIONS FOR USE[®]

Dose and instructions for use

Foliar application: Subtropical crops (khaki, avocado, cherimoya): Three treatments of 300 - 500 cc/hl.

Citrus, fruit trees, olive trees, grapevines and banana tree: during spring use 400 cc/hl; for summer or with high temperatures use 200 cc/hl. **Vegetable:** 2-3 treatments of 200-300 cc/hl.

Application season

Subtropical crops: first treatment towards the end of February, another towards the end of May and the last one towards the end of August. **Citrus and fruit trees:** its use is recommended during the spring and summer sprouting and, last, during fall. **Orchard crops:** its application is recommended during the first third of the crop's cycle.

Presentation

Bottles of 1 liter and drums of 5 and 20 liters.
