

FOSKALIFE

Complex liquid PK fertilizer with potassium and phosphorus from potassium phosphate for application via foliar feeding and fertigation.

GUARANTEED RICHNESS

Phosphoric anhydride (P_2O_5) soluble in water: 30% = **41% w/v**

Potassium oxide (K_2O) soluble in water: 20% = **27,8% w/v**

GENERAL FEATURES

FOSKALIFE is a liquid PK fertilizer that contains 50% of **potassium phosphite** from phosphorous acid. **FOSKALIFE** favors the development of the root system and the set and ripening of the fruits, when applied at the right time. Additionally, its high quantity of **Potassium phosphite** promotes the synthesis of phytoalexins that protect the plant against fungus attacks, e.g. Downey Mildew (oomycete). Also, it protects the plant against the Phytophthora Citrophtora and the parasitic Phytophthora

RECOMMENDATIONS FOR USE

Dose

Avocados, citrus fruits and fruit trees in general:

- Foliar feeding: 150-200cc/hl
- Fertigation: 5-20 L/ha spread in two consecutive irrigations

Strawberry

- Foliar feeding: 200 cc/hl
- Fertigation: 5/6 L/ha

Cucurbitaceae

- Foliar feeding: 200-250 cc/hl
- Fertigation: 5-7 L/ha

Horticultural

- Foliar feeding: 100-200 cc/hl
- Fertigation: 5-8 L/ha

Pinidae

Foliar feeding:: 250 cc/hl (4 applications)

Instructions for use

This product must be sprayed over the parts of the plant above the ground, trying to wet properly the base, the trunk and the crown. In horticultural crops, it must be applied to their bases.

Application season

Avocado trees, citrus trees and fruit trees in general: for the sprouting during spring-summer and the sprouting during September-October.

Strawberry, Cucurbitaceae and horticultural: during the formation of the root system and pre-blooming.

Grapevines: from sprouting until the ripening of the fruits.

Pinidae: from April every 20-30 days.

Presentation:

Bottles of 1 liter and drums of 5 and 20 liters.

Manufactured by:

AGROQUIMICOS Y NUTRIENTES, S.L.
