

# IMPULSE

**Biostimulant that stimulates the sprouting.**

## GUARANTEED RICHNESS

Free amino acids : 8%  
Organic matter: 40%  
Total Nitrogen (N): 10%  
Organic Nitrogen (N): 6,8%  
Ammoniacal Nitrogen (N): 0,4%  
Urea Nitrogen (N): 2,8%

## GENERAL FEATURES

**IMPULSE** is our latest technology in biostimulants, whose main function is to stimulate the sprouting in plants. This product accelerates the internal metabolic processes of the plants to favor their sprouting. Its powerful composition based on VEGETAL STEROIDS, amino acids, organic matter and nitrogen ensures the quick growth of sprouts.

**IMPULSE** is a **Bioestimulant** with a high energetic power. It accelerates the bud development and increases the distance between branch attachments. Therefore, **IMPULSE** increases significantly the vegetative growth.

Manufactured by:

**AGROQUIMICOS Y NUTRIENTES, S.L.**

## RECOMMENDATIONS FOR USE <sup>®</sup>

### Dose and instructions

**Foliar application:** Dissolved in water following a dose of 100 to 150 c.c./hl.

**Fertigation:** between 3 to 6 applications every 15 to 20 days during the vegetative cycle, depending on the crops. The dose is 3-4 L/ha.

### Presentation

Bottles of 1 liter and drums of 5 liters.
