

LIFE 20-8-10

Gel NPK fertilizer with chelated micronutrients for foliar feeding.

GUARANTEED RICHNESS

Total nitrogen (N): 16% = **20% w/v**

Phosphoric anhydride (P₂O₅) soluble in water: 6,4%=**8% w/v**

Potassium oxide (K₂O) soluble in water: 8% = **10% w/v**

Chelated copper (Cu): 0,01%

Chelated manganese (Mn): 0,01 %

Chelated zinc (Zn): 0,01 %

GENERAL FEATURES

LIFE 20-8-10 is a gel fertilizer with chelated microelements with **EDTA** for foliar feeding. **LIFE 20-8-10** is applied using colloidal suspension, which results in the provision of a big amount of nutritive elements with a small dose of the product.

Due to its density, **LIFE 20-8-10** increases its retention time over the leaf, which decreases the phytosanitary losses and improves the absorption of the containing nutrients. We consider **LIFE 20-8-10** the most recommended fertilizer for fruit trees and vegetables at any season, given the concentration and balance of its nutrients.

Manufactured by:

AGROQUIMICOS Y NUTRIENTES, S.L.

RECOMMENDATIONS FOR USE

Dose

Dilute in water to 0.3-0.5 % (300 – 500 cc for 100 liters of water)

Instructions for use

Dilute in the indicated amount of water and spray over the aerial parts of the plant.

Application season

Olive trees: apply from the beginning of the vegetative growth cycle until blooming.

Citrus and fruit trees: apply at the beginning of the spring's bud formation, blooming and when the petals fall down. After the petals fall, apply every 20-30 days.

In general, LIFE 20-8-10 must be applied every 15-20 days, matching the phytosanitary treatment plan.

Presentation

Drums of 5 and 20 liters.
