

LIFE 8-8-6

Gel NPK fertilizer with chelated micronutrients for foliar feeding.

GUARANTEED RICHNESS

Total nitrogen (N): 8% = **9,4% w/v**

Phosphoric anhydride (P₂O₅) soluble in water: 8%=
9,4% w/v

Potassium oxide (K₂O) soluble in water: 6% = **7% w/v.**

Boron (B) soluble in water: 0,01 %

Chelated copper (Cu): 0,01%

Chelated manganese (Mn): 0,01 %

Molybdenum (Mo) soluble in water: 0,001%

Chelated zinc (Zn): 0,01 %

GENERAL FEATURES

LIFE 8-8-6 is a fast-acting fertilizer with chelated microelements for foliar application. **LIFE 8-8-6** improves the plant growth and favors the bloom and the fruit formation. The included microelements are chelated, which results in the impossibility of their precipitation and the improvement of the plant absorption. Its use is recommended in combination with Gibberellic acid during the fall treatments, in order to delay the ripening in some citrus varieties.

RECOMMENDATIONS FOR USE

Dose

Horticultural plants, olive trees, cotton, citrus and fruit trees in general: use diluted in 300-500 cc/hl of water.

Instructions for use

Dilute in the indicated amount of water and spray over the aerial parts of the plant.

Application season

Citrus and fruit trees: apply before and after blooming and matching phytosanitary treatments. Also, this product can be used for citrus trees during fall with Gibberellic acid. **Horticultural plants:** apply every 15 to 20 days matching phytosanitary treatments. **Beet:** start treatment when the plant reaches 15cm high. **Cereals:** apply matching herbicides. **Olive trees:** apply matching the treatments against *Spilosea oleaginea*. **Cotton and grapevines:** apply every 15-20 days or matching phytosanitary treatments. Treatment can be carried out after the fruit recollection in order to prepare the tree for the bud formation during spring.

Presentation

Bottles of 1 liter and drums of 5 and 20 liters.
