

LIFE BORO

Liquid corrector of Boron deficiencies.

GUARANTEED RICHNESS

Total Boron (B): 10% w/w = **13,2% w/v.**
Boron (B) soluble in water: 10% w/w = **13,2% w/v**

GENERAL FEATURES

LIFE BORO is a deficiency corrector in which Boron is solubilized through ethanolamine and it is used via foliar application. It is recommended for correcting Boron deficiencies in all types of crops. It is specially indicated to fight the grapevine winter chlorosis; the apple-tree and pear tree numbness; the thickened crust and "illness of heart" deficiency disease in sugar beet.

Manufactured by:

AGROQUIMICOS Y NUTRIENTES, S.L.

RECOMMENDATIONS FOR USE

Dose and instructions for use:

The regular dose is 300-400 cc/hl.

It is diluted in water and sprayed over the above-ground parts of the plant using machines for phytosanitary treatments. It is recommended to apply 2 or 3 times.

Application Season

The product can be applied **throughout the vegetative cycle**. In order to assure the most effectiveness, it must be applied from the bud-break until bloom (bottom crop) or until the set of the fruit (fruit-trees). The treatment should start before the deficiencies become apparent, when a history of this deficiency is known.

Presentation:

Bottles of 1 liter and drums of 5 and 20 liters.
