

LIFE CaB

Chelates

Complexed Calcium and Boron ethanolamine deficiency corrector.

GUARANTEED ANALYSIS

Boron (B) soluble in water in ethanolamine form : 1,5% = 2% w/v

Calcium oxide (CaO) soluble in water : 7,6% = 10% w/v.

Calcium oxide (CaO) complexed using Heptagluconic Acid: 7% = 9,3% w/v

GENERAL FEATURES

LIFE CaB is a Calcium, complexed using organic acids, and Boron, solubilized using ethanolamine, deficiency corrector used via foliar application and fertigation. **LIFE CaB** is recommended to correct Calcium and Boron deficiencies in all types of crops. The joint application of Calcium and Boron produces an assimilation synergy in the plant. **LIFE CaB** increases the cell division process and results in the enhancement of the cell wall, which improves the quality of the fruits.

It is indicated to correct Calcium deficiency illnesses, such as “Bitter Pit” in apples, blossom end rot in tomatoes and fruit scars. Also, it is recommended to correct Calcium deficiencies in strawberries, vegetables (lettuce, cucumber, pepper, etc), citrus and fruits in general, as well as for fruit skin treatment (Apple, orange, tomato, etc.).

Boron is prescribed for crops that are naturally Boron demanding, such as olive trees, grape vines, vegetables, apple and pear trees, citrus and beets.

DOSE AND INSTRUCTIONS FOR USE

The recommended dose is 200-400 c.c./hl.

APPLICATION SEASON

It can be applied throughout the vegetative cycle. However, in order to assure a higher efficiency, it should be applied from sprouting until flowering in shrub and herbaceous crops and until setting in tree crops. If there have been deficiency problems in the past, it is important to treat the crops prior the appearance of deficiency symptoms.
