

LIFE CALCIO

Liquid corrector for calcium deficiencies with magnesium and chelated microelements.

GUARANTEED RICHNESS

Calcium oxide (CaO) soluble in water: 15% w/w = **22,5% w/v**
Total nitrogen (N): 10% w/w = 15% w/v
Ammoniacal nitrogen (N) ammoniacal: 0,6% w/w
Nitric nitrogen (N): 9,4% w/w
Magnesium oxide (MgO) soluble in water: 2% w/w.

Chelated copper (Cu): 0,05% w/w
Chelated manganese (Mn): 0,05% w/w
Molybdenon (Mo) soluble in water: 0,001% w/w
Chelated zinc (Zn): 0,05% w/w
Chelating Agent: EDTA

GENERAL FEATURES

LIFE CALCIO is a corrector of **Calcium** deficiencies with Manganese and chelated Microelements for its use via foliar application. This is a liquid and soluble product, whose main feature is its high content in water-soluble Calcium.

LIFE CALCIO is used to correct illnesses caused by Calcium deficiencies, such as "Bitter Pit" in apples and tip rot in tomatoes. Additionally, it is indicated for correcting Calcium deficiencies in strawberries, vegetables, citrus and fruit-trees in general.

Manufactured by:

AGROQUIMICOS Y NUTRIENTES, S.L.

RECOMMENDATIONS FOR USE

Dose and instructions for use:

The regular dose is 300-500 cc/hl. This product must be used diluted in water and sprayed over the above-ground parts of the plants with machines used for phytosanitary treatments. The treatment should be repeated twice or thrice.

Application season

In order to fight the so-called "Bitter Pit" in **apple-trees**, treatments should begin when the petals fall down, repeating it every 15 or 20 days. For **tomatoes**, treatments should begin after the set of the fruit and repeated every 15 days. **Strawberries, vegetables, citrus** and fruit-trees **in general**, treatments must be started when Calcium deficiencies become apparent.

Presentation:

Bottles of 1 liter and drums of 5 and 20 liters.
