

# LIFE-H

## Fertilizer solution P 0-40-0.

### GUARANTEED ANALYSIS

Phosphoric anhydride (P<sub>2</sub>O<sub>5</sub>) soluble in water: 40% = 50% m/v

### GENERAL FEATURES

**LIFE-H** is a product with reduced phosphorus and special adjuvants that increases the absorption of phosphate ions. This product has been designed for fertigation. **LIFE-H**'s phosphorus is beneficial for the plant because: 1. It increases the stability of the cellular wall. 2. It stimulates the access ways that produce secondary metabolites. 3. It increases the efficiency of the rest of the nutrients.

### DOSE AND INSTRUCTIONS FOR USE

For horticultural crops, dilute 4-5L/ha in irrigation water and for citrus and fruit trees use 5L/ha or 5cc/dropper. Apply using localized irrigation or flood irrigation. It is advisable to avoid irrigation the day before or the day after the application of **LIFE-H**.

### APPLICATION SEASON

For horticultural crops, the first application should be after transplant (jointly with LIFE's **ROOTER**) and two or more application every 10-15 days when the nutritional complement is required. For citrus and fruit trees, the first application should be with the first spring irrigation, followed by two applications more (one during the summer and another during fall).
