

LIFE KIL

CE fertilizer, NP 10-8-0.

GUARANTEED ANALYSIS

Total Nitrogen (N): 10% = 11,4% w/v

Urea Nitrogen (N): 8,5%

Ammoniacal Nitrogen (N): 1,5%

Phosphoric anhydride (P₂O₅) soluble in water: 8% = 9,12% w/v

Phosphoric anhydride (P₂O₅) soluble in ammonium citrate and water: 8% = 9,12% w/v

GENERAL FEATURES

LIFE KIL is a liquid fertilizer used via foliar application with a large amount of high assimilation Nitrogen and Phosphorus.

Because the slight acid pH contained in **LIFE KIL**, the precipitation of calcium and magnesium salts, which are in the water along with the Phosphorus, is avoided. At the same time, this prevents the hydrolysis of phytosanitaries, which makes this product perfectly compatible with them.

DOSE AND INSTRUCTIONS FOR USE

Foliar application: Dilute it in water following a dosage of 500 c.c./hl.

APPLICATION SEASON

For citrus, fruit-trees, vegetables and ornamentals, it can be applied during any stage of the vegetative cycle. However, its use is not recommended during low temperatures.
