

LIFE KL-50

Liquid NK fertilizer for foliar application and fertigation.

GUARANTEED RICHNESS

Total nitrogen (N): 3% = **4,4% w/v**

Potassium oxide (K₂O) soluble in water: 30% = **44,7% w/v**

Chelated agent: EDTA

IT DOES NOT CONTAIN CHLORINE

GENERAL FEATURES

LIFE-KL50 is a liquid fertilizer rich in potassium. The formula is enhanced with ureic nitrogen, whose function is to increase its absorption.

The potassium in **LIFE-KL50** increases the photosynthetic activity of the leaf, contributing to an increase in CO₂ absorption and favoring the migration of sugar to the reserve organs (fruits). This process results in an early ripening that increases the fruit's size, quality and color.

The application of this product is recommended for all types of crops. Given the high richness in potassium of **LIFE-KL50**, it has been designed to maximize the crops' yield.

Manufactured by:

AGROQUIMICOS Y NUTRIENTES, S.L.

RECOMMENDATIONS FOR USE

Dose

Foliar application: Dilute in 200-300 cc per 100 liters of water.

Fertigation: 30-60 liters per hectare spread in 3-4 applications.

Instructions for use

Foliar application: dilute with the indicated amount of water and spray the aerial parts of the plant.

Fertigation: dilute in the irrigation water directly.

Application Season

In general, this product can be used in all types of crops. Its application is recommended from the **beginning of the fruit setting** until ripening.

Presentation

Drums of 5 and 20 liters.
