

LIFE-KL50

Liquid NK fertilizer for foliar application and fertigation.

GUARANTEED ANALYSIS

Total nitrogen (N): 3% = **4,4% w/v**

Potassium oxide (K₂O) soluble in water: 30% = **44, 7% w/v**

GENERAL FEATURES

LIFE-KL50 is a liquid fertilizer rich in potassium. The formula is enhanced with ureic nitrogen, whose function is to increase its absorption.

The potassium in **LIFE-KL50** increases the photosynthetic activity of the leaf, contributing to an increase in CO₂ absorption and favoring the migration of sugar to the reserve organs (fruits). This process results in an early ripening that increases the fruit's size, quality and color. The application of this product is recommended for all types of crops. Given the high richness in potassium of **LIFE-KL50**, it has been designed to maximize the crops' yield.

DOSE AND INSTRUCTIONS FOR USE

Foliar application: dilute in 200-300 cc per 100 liters of water and spray the aerial parts of the plant.

Fertigation: dilute in 30-60 liters per hectare in irrigation water and spread in 3-4 applications.

APPLICATION SEASON

In general, this product can be used in all types of crops. Its application is recommended from the **beginning of the fruit setting** until ripening.
