

LIFE-KL NEUTRO

NutriLife

Liquid fertilizer with Potassium for foliar feeding and fertigation.

GUARANTEED ANALYSIS

Potassium oxide (K₂O) soluble in water : 30% = 40% m/v

GENERAL FEATURES

LIFE-KL NEUTRO is a liquid fertilizer that contains a high amount of potassium solubilized using organic acids. Also, it contains a penetrating agent that increases its effectiveness. The potassium in **LIFE-KL NEUTRO** increases the photosynthetic activity of the leaf, contributing to an increase in CO₂ absorption and favoring the migration of sugar to the reserve organs (fruits). This process results in an early ripening that increases the fruit's size, quality and color.

LIFE-KL NEUTRO has neutral pH, when diluted to the recommended dosage. Therefore, this product is mixable with the majority of phytosanitary products, without fearing an alkaline hydrolysis or undesirable precipitation reactions. **LIFE-KL NEUTRO** can be mixed with copper for grapevine and olive tree treatments.

DOSE AND INSTRUCTIONS FOR USE

Foliar application: dilute 200-300 cc. per 100 liters of water and spray over the aerial parts of the plant.

Fertigation: dilute 30-60 liters per hectare in irrigation water and spread in 3-4 applications.

APPLICATION SEASON

In general, this product can be used in all types of crops. Its application is recommended from the **beginning of the fruit setting** until ripening.
