

LIFE MIX

Liquid mix of chelated microelements to be used via fertigation.

GUARANTEED RICHNESS

Boron (B) soluble in water: 0,2% w/w = **0,25% w/v**

Chelated copper (Cu): 0,1% w/w = **0,12% w/v**

Chelated iron (Fe): 2% w/w = **2,5% w/v**

Chelated manganese (Mn): 1,5% w/w = **1,9% w/v**

Molybdenum (Mo) soluble in water: 0,05% w/w
= **0,06% w/v**

Chelated zinc (Zn): 0,5% w/w = **0,6% w/v**

Chelating Agent: **EDTA**

GENERAL FEATURES

LIFE MIX is a liquid mix of chelated microelements. This product corrects **microelement** deficiencies, quickly and effectively. **Copper, Iron, Manganese** and **Zinc** salts are stable chelates because of the **EDTA**.

LIFE MIX is specially recommended to be used in irrigation water or drip irrigation because of its solubility. This product does not contain Chlorine and Sodium.

RECOMMENDATIONS FOR USE

Dose

Foliar application: diluted in 100 to 150 cc/hl of water.

Fertigation:

Citrus and **fruit-trees:** nurseries 8-12 cc/foot; recently planted trees: 15-30 cc/foot; first year of production: 35-50 cc/foot; medium sized trees: 50-100 cc/foot; big trees: 100-200 cc/hl.

Vegetables, flower plants and **ornamental:** 5-15 cc/m².

Dosage must be spread in 3 or 4 applications.

Instructions for use

LIFE MIX can be used **via fertigation**, incorporating it directly to irrigation water. If it is used **via foliar application**, it must be diluted with water sprayed with machines used for phytosanitary treatments.

Application season

This product can be used **throughout the vegetative cycle** when microelement deficiencies are first noticed. In citrus, it must be applied during spring and summer bud-breaks.

Presentation

Drums of 5 and 20 liters.
