

LIFE Mn

Liquid deficiency corrector containing complexed Manganese.

GUARANTEED ANALYSIS

Manganese (Mn) soluble in water : 5% = 6,25% w/v
Complexed Manganese (Mn): 2,5% = 5,6% w/v
Complexing agent : Heptagluconic Acid

GENERAL FEATURES

LIFE Mn is a liquid corrector of Manganese deficiencies. This element is complexed by Gluconic Acid and can be used via foliar application or fertigation, in citrus crops, fruit-trees in general, vegetables and cereals.

This product is specially recommended to correct Manganese deficiencies in all types of crops. As it is complexed by the aforementioned acid, Manganese gets easily assimilated by the plant, resulting in the deficiency corrected quicker than using the usual products.

DOSE AND INSTRUCTIONS FOR USE

Foliar application: the regular dose is 200-300 cc/hl, spread into 2 to 3 applications. This product is diluted in water and sprayed over the above-ground parts of the plant, using machines for phytosanitary treatments.

Fertigation: from 6 to 12 L/ha spread in 2-3 applications.

APPLICATION SEASON

For **citrus**, the recommended application period is during the spring and summer bud-breaks. **Vegetables, fruit-trees, cereals** and **industrials**, the application must be applied during the first third of the crop season.
