

# LIFE-SZ

**Fertilizer that corrects simultaneously Zinc and Manganese deficiencies.**

## GUARANTEED RICHNESS

Boron (B): 0,9%  
Manganese (Mn): 9%  
Molybdenum (Mo): 0,4%  
Zinc (Zn) : 11%

### GENERAL FEATURES

**LIFE-SZ** corrects simultaneously Zinc and Manganese deficiencies, as these deficiencies are normally related to citrus crops. Also, it contains Boron, Molybdenum and Sulfur. **LIFE-SZ** is a comfortable and secure way to provide these elements, given that these are essential for a correct vegetative balance.

**LIFE-SZ** is an affordable and easy way to correct the deficiencies mentioned above, as it is **compatible with most phytosanitary treatments**. **LIFE-SZ** is used **via foliar application**, which bypasses the problems caused by the absorption in different types of soils in fertigation. This product has been designed for a quick absorption that provides instant results.

Manufactured by:

**AGROQUIMICOS Y NUTRIENTES, S.L.**

### RECOMMENDATIONS FOR USE

#### Dose and instructions for use

The normal dose is 5,5 Kilos per 1000 liters of water.

It is used dispersed in water, then sprayed over the aerial parts of the plant using machines for phytosanitary treatments.

#### Application season

**For citrus**, its application is recommended at the beginning of the spring and summer sprouting, when new leaves reach 2/3 of their normal size.

**For orchard crops, flowers and fruit trees**, it can be applied throughout the vegetative cycle, being sprouting the best time.

#### Presentation

5,5 Kilos plastic bags (boxes containing 4 units).
