

LIFE ZincBor

Corrector of Zinc and Boron deficiencies.

GUARANTEED RICHNESS

Boron (B) soluble in water: 2% = **2,5% w/v**

Zinc (Zn) soluble in water: 5,33% = **6,4% w/v**

Zinc (Zn) complexed by heptagluconic acid: 2,67% = **3,36% w/v**

GENERALES

LIFE ZincBor is a corrector of Zinc and Boron deficiencies, containing Zinc complexed by heptagluconic acid and Boron solubilised by ethanolamine. In this solution, both Zinc and Boron are absorbed easily while using a small dose.

LIFE ZincBor is indicated to correct Zinc and Boron deficiencies in all types of crops. The joint action of both elements produces a synergy in their assimilation by the plant. This product can prevent or correct the deficiencies produced by an unbalanced assimilation of these nutrients.

LIFE ZincBor is recommended for rice, cereals, citrus-trees, vegetables, grapevines, nurseries, etc.

Manufactured by:

AGROQUIMICOS Y NUTRIENTES, S.L.

RECOMMENDATIONS FOR USE

Dose and instructions for use:

Dilute it in water at a dose of 300-500 cc/hl. This product has to be applied to the above-ground parts of the plant using machines for phytosanitary treatments.

Application season

This product can be used **throughout the vegetative cycle**. It is advisable to use it at the beginning of the bud development and after the flowering. It is recommended to apply this product if deficiency symptoms appeared in previous years.

Presentation:

Bottles of 1 liter and drums of 5 and 20 liters.
