

# LIFE GROS

**Biostimulant with amino acids, organic matter and natural steroids.**

## GUARANTEED RICHNESS

Free amino acids: 9% = **10% w/v**  
Total nitrogen (N): 2,8%  
Organic nitrogen: 2,8%  
Organic matter: 20%

## GENERAL FEATURES

**LIFE GROS** is a **biostimulant** that contains the required intake of **amino acids** and **organic matter** for the plant's health. It has been designed to be used via foliar application or fertigation. **LIFE GROS**'s amino acids are absorbed directly by the plant and save the plant the process of synthesizing them. The energy saved increases the plant's genetic potential, as the amino acids are absorbed rapidly and transported to the organs with more activity. In addition, **LIFE GROS** contains natural hormones (vegetal steroids) that increase the synthesis of ARN, DNA and other proteins. Also, it promotes and stimulates the cellular division, increasing tails and fruits elongation.

Therefore, **LIFE GROS** is recommended for increasing the fruit setting and to improve the fattening of the fruit in all types of crops, **especially citrus-fruits, stone-fruits and fruit vegetables**. **LIFE GROS** decreases, in citrus-trees, the number of fruits that fall down, while increases their size. The results are similar to phyto regulators.

Manufactured by:  
**AGROQUIMICOS Y NUTRIENTES, S.L.**

## RECOMMENDATIONS FOR USE

### Dose

**Foliar application:** dilute it in water, the dose is 100-200 c.c./hl.

**Fertigation:** for vegetables 2-3 liters/hectare and per application until reaches 6-9 liters/hectare.

### Application season

**Citrus-trees:** first application during the fruit setting and another one after the fruit physiological ripening, so the fattening of the fruit improves.

**Stone fruits:** two treatments, one when the petals fall down and another one 30 days after.

**Vegetables:** treatments in intervals of 15-20 days in order to set the fruit.

### Presentation

Bottles of 1 liter and drums of 5 liters.
