

# MOJALIFE

**Liquid fertilizer with Potassium for foliar application**

## GUARANTEED RICHNESS

**Potassium oxide (K<sub>2</sub>O) soluble in water: 6%**

IT DOES NOT CONTAIN CHLORINE

### GENERAL FEATURES

**MOJALIFE** increases the wetting properties of a phytosanitary mixture.

**MOJALIFE** is a liquid fertilizer containing Potassium solubilized by Organic Acids.

The Potassium in **MOJALIFE** increases the photosynthetic capabilities of the leaves, resulting in an increased absorption of CO<sub>2</sub>. This process favors the migration of sugars to the reserve organs (fruits), which advances ripening, increases the fruit's size and improves their quality and color.

**MOJALIFE**, diluted following the recommended dose, contains a **pH slightly acid**, favoring its mixture with most phytosanitary products, without fearing an alkaline hydrolysis or unwanted precipitations.

Manufactured by:

**AGROQUIMICOS Y NUTRIENTES, S.L**

### RECOMMENDATIONS FOR USE

#### Dose

The normal dose is **100 c.c. for every 100 liters of water (0,1%)**, using enough product to wet well the plant.

#### Application season

In general, use it for all types of crops (**citrus, olive trees, grapevines, vegetables, fruits in general, etc.**), its application is recommended throughout the vegetative cycle of the crop.

#### Presentation

Bottles of 1 liter and drums of 5 and 20 liters.
