

NATURLIFE-K

Liquid foliar fertilizer with Potassium.

GUARANTEED RICHNESS

Potassium Oxide (K₂O) soluble in water: 6%

IT DOES NOT CONTAIN CHLORINE

GENERAL FEATURES

NATURLIFE-K is a liquid fertilizer with solubilized Potassium by organic acids. Its penetrating effects enhances its effectiveness.

NATURLIFE-K increases the photosynthetic activity of the leaves, increasing CO₂ absorption. This process favors the migration of sugars towards the fruit's reserve organs, which advances ripening and increases the fruit's size, quality and color.

NATURLIFE-K has a neutral pH, which means that can be mixed with the majority of phytosanitary products. Because of its neutral pH, there is no risk of alkaline hydrolysis with phytosanitary products, avoiding the precipitation of those products.

Manufactured by:

AGROQUIMICOS Y NUTRIENTES, S.L.

RECOMMENDATIONS FOR USE

Dosage

Foliar application: 50-80cc/100 liters of water.

Instructions

Foliar application: dilute it with the indicated quantity of water and spray it over the above-ground parts of the plants,. This product has to be used with high pressure and a thin drop.

Season of application

Its use is recommended for every kind of crops (orange-trees, olive-trees, grapevines, horticultural plants, fruit-trees in general, etc.), and it is recommended throughout the vegetative cycle.

Presentation

Bottles of 1 liter, drums of 5 and 20 liters.
