

NITROLIFE

Amino acids.

GUARANTEED ANALYSIS

Free amino acids: 6% w/w

Total Nitrogen (N): 1.15% w/w

Organic Nitrogen (N): 1.15% w/w

Aminogram: ALA, ARG, ASP, GLU, GLY, HYP, HIS, ILE, LEU, LYS, MET, PHE, PRO, SER, THR, TYR, VAL.

GENERAL FEATURES

NITROLIFE is a biostimulant product that contains the right amount of amino acids and organic matter to be used via fertigation. The amino acids contained in **NITROLIFE** are absorbed directly by the plant and save the energy destined to synthesize them. These energy savings result in an immediate response by the plant to reach its full genetic potential.

NITROLIFE unlocks the phosphorus, calcium and iron in the soil, allowing an improved absorption of these elements and a better root development.

DOSE AND INSTRUCTIONS FOR USE

NITROLIFE must be used via fertigation using a dose of 3-5 l/ha and repeat the application after 30 days.

Citrus and fruit trees: the dose is 5 l/ha per application.

Vegetables: the dose per application is 3 l/ha.

APPLICATION SEASON

Citrus, fruit-trees in general: Apply for the first time before the spring sprouting and repeat after 30 days. Also, it can be applied throughout the vegetative cycle if not already done.

Vegetables: Apply 10-15 days after transplant and repeat 3 weeks later.
