

ORGANLIFE MIX

GUARANTEED RICHNESS

Total Fulvic Acids: **30% w/w**
Density: 1,21
pH: 3

GENERAL FEATURES

ORGANLIFE MIX contains an important amount of Organic Matter and Fulvic acids that improves the soil's physicochemical properties, favoring the microbial life and enhancing the development of the root system. These conditions improve the soil exploration and the surface absorption, guaranteeing an efficient absorption of the nutrients.

This product does not contain Sodium.

Manufactured by:

AGROQUÍMICOS Y NUTRIENTES, S.L.

RECOMMENDATIONS FOR USE

Dosage and instructions for use

Foliar application: dilute it in water, 200-300 cc/hl.

Fertigation: dilute it in water 50-100 cc/m³ and apply it to irrigation water. Regarding flood irrigation, **ORGANLIFE MIX** must be applied from 75 to 100 L/ha per year, spread in several applications.

Application season

ORGANLIFE MIX was produced in order to use it in all type of crops, at any time of the vegetative cycle.

Presentation

Drums of 5 and 20 liters.
