

PODALIFE

Healing paste for pruning and grafting injuries.

GUARANTEED RICHNESS

Flexible polymer emulsion.

GENERAL FEATURES

PODALIFE is a paint used to cover injuries caused by pruning and grafting.

PODALIFE creates an elastic and waterproof layer over the injury, protecting it from the damaging effects of the sun, the rain, the dew, etc. **PODALIFE** prevents the infection of those injuries and their effects last until the injury is perfectly healed. It must be applied 24 hours after the pruning.

Manufactured by:

AGROQUIMICOS Y NUTRIENTES, S.L.
