

QUELACOR

Liquid corrector of Zinc deficiencies.

GUARANTEED RICHNESS

Manganese (Mn) soluble in water: 2% w/w = **2,4% w/v**

Chelated Manganese (Mn): 2% w/w = **2,4% w/v**

Zinc (Zn) soluble in water: 3% w/w = **3,7% w/v**

Chelated Zinc (Zn): 3% w/w = **3,7% w/v**

Chelating agent: EDTA

GENERAL FEATURES

QUELACOR is a liquid corrector of Zinc and Manganese deficiencies. Zinc and Manganese are 100% chelated by **EDTA** and they can be used via **foliar application** or **fertigation** in citrus, fruit-trees, vegetables, olive-trees and grapevines. Because of its fabrication method, this product contains approximately **8% of Potassium (K₂O)** that acts as crop's quality element.

RECOMMENDATIONS FOR USE

Dose

Foliar application:

Citrus: during spring treatments it must be used 150 cc per 100 liters of water; summer treatment 75 cc per 100 liters of water.

Fertigation: applied through the soil by injection or circular ditches of 20cm deep,

Trees in nursery and ornamental: 5cc per foot and year.

Young trees and grapevines: 20-30 cc per foot and year.

Production trees: 75-125 cc per foot and year.

Application season

For **citrus**, it is recommended its application **during the spring and summer bud-breaks**. Regarding **vegetables, flowers and fruit-trees**, the product can be applied **throughout the vegetative cycle**, being the bud-breaks the most recommended.

Presentation

Bottles of 1 liter and drums of 5 and 20 liters.
