

QUITOLIFE

Active plant protection substance.

Varios
ECO-NUT

GUARANTEED ANALYSIS

Chitosan : 2,5%

GENERAL FEATURES

QUITOLIFE is a product that contains chitosan and protects the crop against plagues and pathogens. **QUITOLIFE** activates the defense mechanisms of the plants by increasing the natural resistance of their cellular wall. The pathogen penetration is stopped by the formation of various substances, e.g. Lignin, tannins, phenol and cellulose. Furthermore, **QUITOLIFE** stimulates the creation of new roots and secondary roots and protects them against nematodes.

DOSE AND INSTRUCTIONS FOR USE

Foliar application, dilute 300-500 c.c./100 liters of water into a spray tank while shaking well with water, then add the rest of components. It is advisable to control the **pH** and double check that it is around 6-6,5. The number of applications is 3-4.

Fertigation, apply the indicated dose and double check that the pH is below 6,5. **For vegetables:** use 3-5 liters/hectare from transplant every 15-20 days. **For fruit-trees:** use 20L/ hectare spread in 2-3 irrigations.
