

SUGAR-LIFE

Biostimulant with amino acids.

GUARANTEED RICHNESS

Free amino acids: 8% = (8,4% m/v)

Organic nitrogen (N): 1,9%

Total nitrogen (N): 1,9%

GENERAL FEATURES

SUGAR-LIFE is a **bioestimulant** that contains the right amount of amino acids, organic matter and chelated micronutrients for its use via foliar application or fertigation. The amino acids in **SUGAR-LIFE** are absorbed directly by the plant and save the task of synthesizing them.

The mix of amino acids selected thoroughly in the adequate proportion influences the metabolism of the plant, in a way that accelerates the internal ripening of the fruit without affecting the change of skin color.

Manufactured by:

AGROQUIMICOS Y NUTRIENTES, S.L.

RECOMMENDATIONS FOR USE

Dose and mode of use

Foliar application: for two applications, dilute it in water following a dose of 150cc/hl.

For a single treatment, the dose is 250cc/hl.

Application season

Citric and fruit trees: use **SUGAR-LIFE** via foliar application a month and a half before harvest and repeat 15 days after the treatment above.

Vegetables: treat every 15-20 days to induce the internal ripening of the fruit.

Presentation

Bottles of 1 liter and drums of 5 and 20 liters.
